

PEX

ToppTube™ PEX is a high density cross-linked polyethylene tube.

It has excellent resistance against heat, impact and chemicals. It is mostly used in piping and plumbing parts. Can be used on portable water application too.

PEX

Mostly used in piping and plumbing

- Material:** Polyethylene PEX
- Hardness:** 56 Shore D ISO 868
- Structure:** Single-layer tube
- Installation temperature:** -30 °C ... +60 °C
- Tolerances:** According to DIN 74324
- Colours:** Black, blue, natural
- Density:** 0,924 g/cm³ according to the ASTM D792 testing method
- Chemical resistance:** Excellent resistance at high pressures and temperatures especially against gases and liquids
- Manufactured sizes:** Outer diameter 4,0 mm ... 22 mm

Technical information

mm	+/-	mm	+/-	mm	bar	20°C	bar	40°C	bar	60°C	bar	80°C	mm	g/m
6	0,1	4	0,2	1	26	18	13	8	36	16,4				
8	0,1	6	0,2	1	19	13	19	6	50	23,1				
10	0,15	7	0,3	1,5	23	16	11	7	60	42,1				
10	0,15	8	0,2	1	14	10	7	4	80	29,7				

The safety factor for working pressure is 3.
