

ToppSpiral™ – handy accessibility with a tailored spiral tube

ToppSpiral™ is a premium quality spiral tube. Its flexibility provides handy accessibility in pneumatic systems. The tube is made of durable polyamid which maintains its shape. For vertical installations we recommend a semi-rigid quality, and for horizontal installations a rigid quality.

See the technical characteristics of the tube on the PA12 product card. We also manufacture spirals from PUR and PA11.

ToppSpiral™
Endures and
holds its shape

Recommendation for use: For horizontal installation, we recommend PA12P40 and for vertical installation PA11
Spiral diameter: Minimum 22 mm, maximum 320 mm
Tube diameter: Outer diameter 4 mm - 25 mm
Colour: Blue, other colors to order
